LEAVES,
FISH OR MILK

As a baby mammal (embryo) develops inside the womb, it gets carbon dioxide and waste from its mother.
TRUE OR FALSE?

When the male sperm and the female egg meet and join to create a baby, what is this called?
OVULATION, GERMINATION OR FERTILISATION

The sexual organs of male mammals are called the vulva and vagina.
TRUE OR FALSE?

The part of the mother's body that babies develop inside is called the womb or uterus.
TRUE OR FALSE?

As a chick develops inside the egg, it eats the yolk to help it to grow healthy and strong.
TRUE OR FALSE?

The female mammal uses teats (known as breasts in humans) to feed her baby.
TRUE OR FALSE?

Many animals use mating rituals or displays to attract a mate. One visual display humans often use is to wear clothes that make them feel attractive. This means that any time humans wear nice clothes, they are always looking for a mate.
TRUE OR FALSE?

What is the scientific word we use to mean going through the teenage years?

YOUTH,
JUVENILE
OR PUBERTY

As humans go through puberty, what changes can they expect to notice?

CHANGES IN VOICE,
DEVELOPMENT OF SEXUAL ORGANS,
CHANGES IN BODY SHAPE AND/OR
HAIR GROWTH
