'Two true and one false statement' questions:

The true statements are written below.

刺豚鼠 cìtúnshǔ

The false statement is C.

Agouti's can swim really well.

斑马 bānmǎ

The false statement is C.

Each zebra's stripes are unique, like fingerprints.

黑鹤 hēi guàn

The false statement is B.

Both the male and the female stork incubate the eggs.

火烈鸟 huǒlièniǎo

The false statement is A.

Flamingos can fly.

金剛鸚鵡 jīngāngyīngwǔ

The false statement is C.

Macaw's can live up to 50 years.

狮子 shīzi

The false statement is A.

The Asiatic lion is smaller than the African lion.

大食蚁兽 dà shíyǐshòu

The false statement is C.

Giant anteaters only have one baby at a time. It has never been known for a giant anteater to even have twins.

大熊猫 dà xióngmāo

The false statement is B.

Giant pandas mainly eat bamboo but can eat some other foods and eat a little meat in the wild.

小熊猫 xiǎo xióngmāo

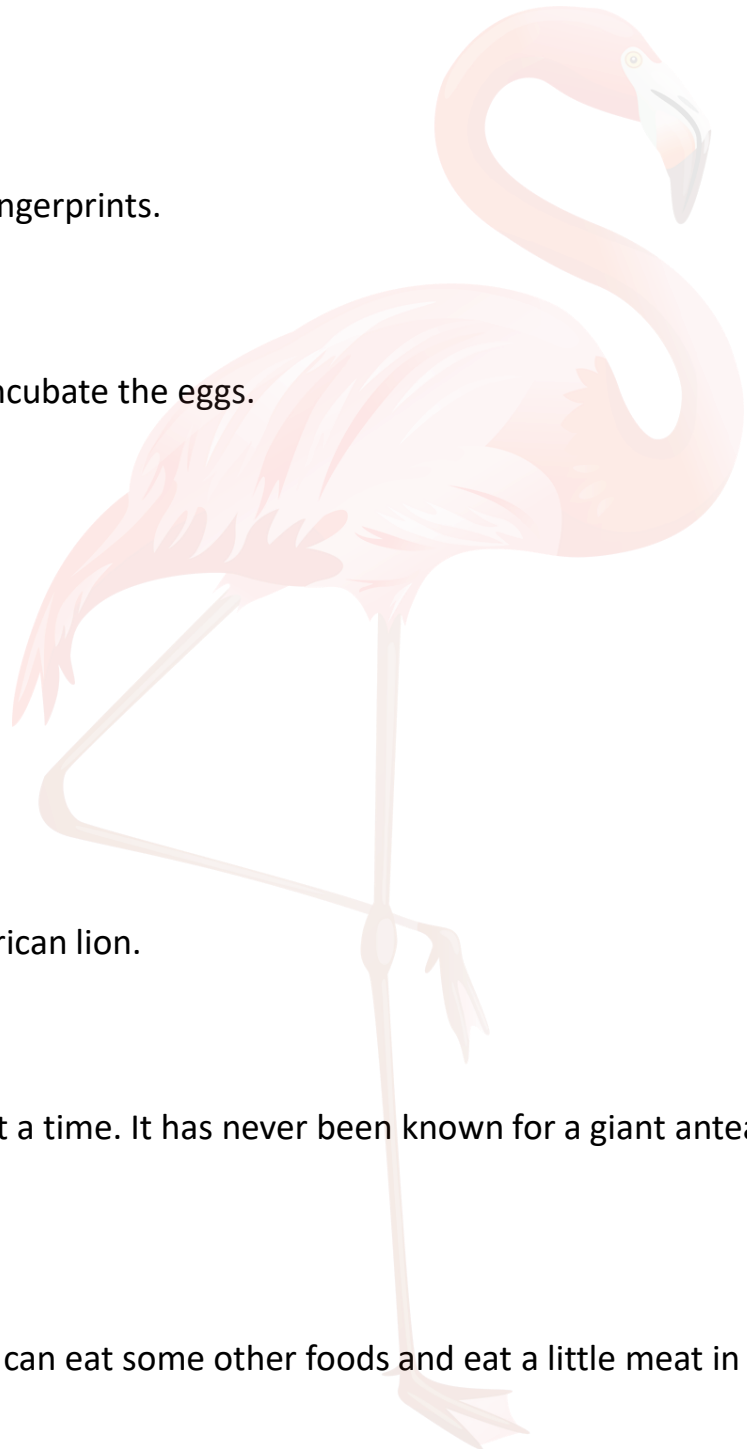

The false statement is A.

Red pandas are not in the same family as giant pandas. Giant pandas are bears. Red pandas are in a family all by themselves. However, they do share some similarities to the giant panda like the overgrown wrist bone.

环尾狐猴 huánwěi húhóu

The false statement is B.

Ring tailed lemur's cannot grip with their tail.

True or false questions:

The sentences on the following cards are all true:

多毛犛狻 duōmáo qiúyú

野马 yěmǎ

僧帽猴 sēngmào hóu

黑猩猩 hēixīngxing

考拉 kǎolā

松鼠猴 sōngshǔ hóu

水獭 shuǐtǎ

印度犀 Yíndù xī

猫鼬 māoyòu

小袋鼠 xiǎodàishǔ

The sentences on these animal cards are false:

The true sentences are written below.

钝口螈 dùnkǒuyuán

The axolotl is an amphibian.

长臂猿 chángbìyuán

Gibbons are very vocal and can be heard making a range of noises that are often described as a song.

长颈鹿 chángjǐnglù

Giraffe tongues can be about 50cm long.

树懒 shùlǎn

The sentence on the card is false.

Sloths spend nearly all their time in the trees. They usually only come down to the ground to go to the toilet.

Multiple choice questions:

犛犛 qiúyú

The correct answer is A. All species of armadillo are found in Central and South America. One species, the nine banded armadillo, is also found in North America.

鹤鸵 hètúo

The correct answer is A. The cassowary mainly eats fruits but can eat some small animals like insects, small rodents and chicks.

狐猴 húhóu

The correct answer is C. Lemurs are only found in Madagascar.

马来熊 mǎláixióng

The correct species is the sun bear. It is also called the Malayan bear.

企鹅 qǐé

The correct answer is A. Try to find out the names of all the species.

巴布亚企鹅 bābùyà qǐé

The correct sentence is C. Gentoo penguins will lay 2 eggs at a time. Most of the penguin species lay two eggs and make some form of nest but the emperor and king penguins only lay one egg and carry it on their feet.

红玫瑰狼蛛 hóng méiguī lángzhū

The correct answer is B. The Chilean rose tarantula's venom is mainly for helping it digest its prey and would not be able to kill a human.

老虎 lǎohǔ

The correct answer is B. The Sumatran tiger is the smallest of the subspecies and the Amur tiger is the largest.

'Giant' extension work:

1. Try to say some simple sentences in Mandarin describing the animals. For example, use the sound files about colours on the 'Giants' section of Beyond the Panda and form sentences like - 大熊猫是黑白的。Dàxióngmāo shì hēi bái de.

2. Learn more about the RZSS 'Giants' programme which looks at two of these animals in more detail - 大熊猫和大食蚁兽。Dàxióngmāo hé dà shíyǐshòu. The programme also compares the two different languages in the areas these animals are found. There are lots of games with sound files to learn more about them and the games have Mandarin and Spanish versions - beyondthepanda.org.uk
