

TIME TO SAY A GIANT FAREWELL

ANIMAL AMBASSADORS

The Royal Zoological Society of Scotland is a conservation charity with a big mission:

To save wildlife and empower people in Scotland and around the world to protect, value and love nature.

We cannot do this alone, and the animals we have in our Zoo are ambassadors that allow people to connect with nature, highlighting the amazing work we do around the world.

As you explore the Zoo today, discover more about our animal ambassadors and the work our charity does to prevent the further decline of global biodiversity.

SCOTLAND'S WILDCAT

We are proud of the work RZSS is doing to save native species, and plans are underway to reintroduce wildcats. **What is the major threat to Scotland's wildcat?**

NORTHERN ROCKHOPPER PENGUINS

At RZSS we work closely with Project Pinnamin to complete genetic analysis, surveys and action plans. **Where would Rockhopper Penguins be found in the wild?**

GREATER ONE HORNED RHINO

At RZSS we work to prevent and end the trade in illegal animal products such as Rhino Horn, using DNA sequencing and profiling.

What is the name of our onsite Genetics Lab behind the Education Centre?

SUN BEAR

One of our amazing Sun Bears, Rotana is a rescue from the illegal pet trade. We continue to work with leading Sun Bear conservation partners.

Name this conservation partner organisation?

CHIMPANZEE

We are very proud of the work conducted both in Scotland and in Budongo Conservation Field Station (BCFS) to promote sustainable forest management.

Where in the world is the BCFS based? (Country)

ARMADILLO

We research Giant Armadillo behaviour and populations in the wild . We have 2 species of armadillo here at the Zoo.

What is the unique animal group Armadillos, Anteaters and Sloths belong to?

SUMATRAN TIGER

The RZSS WildGenes team have been developing genetic testing to identify their prey, helping to reduce human-tiger conflict in Nepal.

Name two major threats facing Sumatran Tigers.

GIANT PANDA

As part of a 10-year partnership agreement with CWCA, we have assisted 40 Giant Panda research projects worldwide.

What is the current IUCN Red List Status of Giant Panda?
