# Native Wildlife Safari

RZSS Wild about Scotland supported by Clydesdale Bank

Scotland has some of the best wildlife in the UK but a lot of our native animals are very shy and hard to spot.

Tick off the animals that you have seen whilst walking in your local area or on holiday in Scotland. Share with your family & friends and to see who has the keenest eyes for wildlife.

## Notes

If there is anything else interesting you have spotted then write down your notes here!

Most photos supplied by RZSS Photographer in Residence Laurie Campbell

## Top Tips

- Stay nice and quiet at all times so not to scare any animals away
- Don't get too close to the animals so use binoculars to observe from a distance
- Take lots of photographs to show your friends

Animal  
Badger

Habitat  
Woodland

Diet  
Worms,  
insects, small  
mammals,  
fruits and  
nuts

Spotted? (tick)
