

DIGITAL DELIVERY

Teaching and learning online offers plenty of potential for fun and new engagement. The following tips, tools and technologies help you get the most from digital delivery!

**Be Yourself,
Be Human!**

**Make
Mistakes**

**Leave Time
To Think**

**Use Props/
Costumes**

**Draw Your
Thoughts**

Video Conferencing

Different software will have different capabilities, but these are some things you might like to look out for!

Rooms**

Presentations

Some hints to keep your presentations engaging:

-  Keep slides simple, no more info than you would put on a shirt!
-  Make handouts for purpose, not a copy of your slides.
-  Try using live captions.
-  Use shortcuts, such as "B" for a black screen or number+enter to skip to slides.

TOOLS & TECHNOLOGIES

Digital Learning Environments

Make your learning truly interactive and available to everyone. Try Moodle or H5P on Wordpress free.

Collaborative Documents

Work together live in real time on documents. Try Google Docs, Jamboard or Microsoft 365 for free.

Audience Response Systems (ARS)

Add interaction to your sessions and collect data! Check out Sli.do, Vevox or Mentimeter for free.

QR codes

Create quick links to your online content. It's worth adding a link too! Try QRcode-monkey free.

Augmented Reality (AR)

Interactive 3D models on your own phone! Find free models on SketchFab, and use XR.+ for an AR app.

Virtual Reality (VR)

Explore new worlds in VR! Try Google Cardboard for creating and viewing, or Marzipano for free 360s.

DIGITAL WELLBEING

It's important to look after learners so they can get the most from our sessions, especially when they are spending more time learning online.

Ask how they are?

Adapt your session to how they feel - add more breaks or more interactions.

Add breaks

Even just 3 minutes! Remind learners to grab a drink, move, or to close their eyes.

Open early...

Give time to get to know each other before starting.

Use music

Music can set a scene and helps some with retention.

...and close late!

Allow extra time for informal questions. Stop recording to make it more relaxed.

Start simply

Starting with a blank white or black slide might help prepare for incoming learning!
