

Meet the Ancestors

Many of the animals in Edinburgh Zoo can trace their roots right back to the dinosaurs! Raptors, like the Utahraptor here for example, are early ancestors of birds like our flamingos. Although separated by millions of years, both amazing animals hatch from eggs and are covered in feathers!

Create your own "Flexangle" to see the life cycles of our fabulous flamingos and roarsome raptors!

1. Score along all dotted lines (diagonal & vertical)

2. Cut out along the solid lines

3. Fold all vertical lines with printed sides together

4. Fold all diagonal lines with white sides together

5. Glue the back of point A to the white A tab

6. Glue the back of point B to the white B tab

7. Bring tab C round and glue onto the back of the picture at point C

8. Bring tab D round and glue onto the back of the picture at point D

9. Glue the back of point E to the white E tab.
